DETAILED ACTION

This Office Action is in response to the amendment filed 15 May 2006.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Christopher Li on August 4, 2006.

The application has been amended as follows:

Claims:

6. A flash memory, comprising: a plurality of memory cells, each memory cell having a single transistor having a single control gate, a single floating gate, a single drain and a single source, said plurality of memory cells arranged in an N-row by M-column array, where N and M are integers greater than or equal to one; N word lines, each word line connecting together the control gates of the transistors in a common and corresponding row; M bit lines, each bit line connecting together the drains of transistors in a common and corresponding column; wherein first and second memory cells of the plurality of memory cells are programmed by applying a first voltage to the respective control gates of the first and second memory cells, applying a second voltage to the

Art Unit: 2822

respective sources of the first and second memory cells and grounding the respective drains of the first and second memory cells, wherein the sources of the first and second memory cells are coupled to a common node, wherein the sources of a plurality of memory cells are connected together to a common node, wherein each of the sources of the memory cells includes a first doped region of a first conductivity type and a second doped region of the first conductivity type to provide a graded profile that is less abrupt than the drain **wherein the control gate is applied with a first voltage of 8.5 volts or less and the source region is applied with a second voltage of 4.5 volts or less to program the non-volatile device.**

Allowable Subject Matter

Claims 6-25 are allowed.

The following is an examiner's statement of reasons for allowance: Claims 6-25 are allowable because prior art does not show alone or in combination along with the limitations of the independent claim such as the control gate is applied with a voltage of 8.5 volts or less and the source region is applied with a second voltage of 4.5 volts or less to program the non-volatile device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kiesha L. Rose whose telephone number is 571-272-1844. The examiner can normally be reached on T-F 8:30-6:00 off Mondays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Zandra Smith can be reached on 571-272-2429. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
